Duty Officer/Responder Name: Josephine Martin	NRC Report #: 1280100	Hotline Log DataID: 2670153
Action Information		
Description: Spoke to the RP at this time, he informed me they found out about the leak at 0830 and are doing their investigation at this time to locate the source. He is unaware of the source but it is a sub surface feder M52 leak. Search activity is in progress and NRC and local authorities have been contacted. Per Mike Beto they will have a follow up call on the status at approximately 1400 due to these taking time to locate. Closest water way is the Harlem River, but the leak is not in the river from what they are aware of at this time.. Once it has been located state officials will assist, will follow up with Mike Beto and DEC/DEP.. Reached out to DEC for the State of NY Spoke to Eric (received spill ID number) who informed me they are treating this as a leak watch, they have informed their off duty Spill Responder to follow up on the incident after 15:30.. EPA will follow up in the afternoon to see if any help is requested.
